

Software Developer

Application Engineering

C# / .NET Developer · Bracknell, UK

Good software doesn't stop at writing code. It has to work.
Application Engineering is where development meets delivery.

Join our client's team in Bracknell to build and deploy
mission-critical communication applications.

ASSESSMENT DAY

FRIDAY | 4 September

Bracknell, UK

9:00 AM – 5:00 PM

What Will You Actually Do?

Delivering mission-critical communication solutions across the entire software development lifecycle.

C# Development & Architecture: Write clean, maintainable C# code and design core application architecture.

Agile & Technical Specs: Work within Agile teams to build back-end features and contribute to technical design decisions.

Testing & QA Validation: Thoroughly test new features and collaborate with QA to validate builds before release.

Maintenance & Code Reviews: Investigate bugs, perform platform upgrades, and participate in peer code reviews.

Continuous Improvement & Prototyping: Analyze deployments, pilot prototype applications, and adopt emerging technologies.

The Role is Broad. C# is at Its Core

Key technologies & ways of working:

</> C# & .NET 5/6 — Core

SQL — Data

Git - Source Control

Agile / Scrum - Delivery

JS / TS / React.js - Front End

OWASP ASVS — Security

Docker / Kubernetes - Platform

Strong software fundamentals matter more than ticking every box.

Who We Are Looking For

Graduates and developers ready to turn complex requirements into production-ready software.

Degree: STEM / Computer Science / Related

Experience developing commercial projects or applications using C#

Experience with SQL and relational databases such as Microsoft SQL Server.

Experience using source control, particularly Git

Experience working within an Agile/Scrum environment

Knowledge of OWASP ASVS or equivalent application security standards

Experience with .NET 5 or .NET 6

Experience with JavaScript, TypeScript and React.js.

Knowledge or experience of Docker and Kubernetes.

Assessment Day 4 September 2026
